

Palisade Fencing

6 Different Spikes To Choose From:

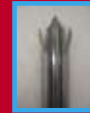

DEVIL'S FORK

SPEARHEAD

STRAIGHTHEAD

TRIDENT SPIKE

SWALLOWS TAIL

SPEARHEAD

Palisade fencing is a robust, durable and versatile fence that follows the natural lie of the ground eliminating gaps that would otherwise occur with panel form fencing.

Available in two styles, the traditional W pale where the head of the bolt is concealed in the profile for maximum security, and the V pale for general purpose security installations.

Swing and sliding gates are made to both styles of fencing, with pales bolted to the frame on site for quick and easy installation.

Palisade is offered in heights from 1,200mm to 3,600mm and also available for the DIY enthusiast.
